TECHNICAL SKILLS:

- Java, JavaFX, PHP, Python, C#
- Front-End Stack (Html, CSS, JavaScript)
- Front-End-Frameworks (jQuery, Angular)
- Back-End (JavaEE, PHP)
- RESTful API
- SpringBoot (ORM, MVC, Data-JPA)
- Database (MySQL, Oracle database, PostgreSQL)
- IoT using raspberry pi, using python
- Real-time database firebase
- DevOps CI/CD with Jenkins Pipeline
- Linux basic commands
- Docker Container
- Amazon Web Services (AWS)

CERTIFICATES:

- OOPS using Java with Data Structures and Beyond (2021)
Ministry of communication and information technology (MCIT)-Simplilearn
- Java Back-end expert (2021)
Ministry of communication and information technology (MCIT)-Simplilearn

PROFESSIONAL SUMMARY

Well-qualified Full Stack Developer familiar with a wide range of programming utilities and languages, including Java (core, SpringBoot) and PHP for web back-end programming (server-side). Knowledgeable of front-end development requirements. Handles any part of the process with ease. Good knowledge of software engineering concepts. Collaborative team player with excellent technical abilities.

PROJECTS

Smart Firefighting System Based on IoT

- Design and implement a smart firefighting system based on IoT.
- Fast fire detection in real-time.
- Smart communication between system nodes.
- Store the start timestamp and location of the fire in real-time.

TOOLS: Raspberry Pi 3, Flame sensor, Buzzer, Relay, Water pump, firebase database

EMPLOYEE MANAGEMENT SYSTEM

- Employee management system (EMS) is a system that can provide management to your employee.
- Calculate vacation days (total days, used days, and credit days).
- Adding new employees by providing an excel sheet or the system GUI.
- Export all or some selected employees to an excel sheet.

TOOLS: JavaFX, Darby Embedded Database, MVC, and DAO Design patterns.

Car Renting webApp

- Cars providers can log in/register
- Cars providers can add/delete/edit the cars, also see the history of all renters of a specific car
- The ability to see all the cars of the selected provider
- Car renters can rent cars with no limitations
- Car renter can see the history of all previously rented cars
- All the communication between the front-end and back-end is through JSON

TOOLS: HTML, CSS, JavaScript, PHP, JSON, MySQL, MVC patterns.
